FEATURED PRODUCT - 20" FLOOR POLISHER \$795

Purchasing a floor polisher is the first step in mechanizing your tent washing process. Use a floor polisher to get a deeper clean in a fraction of the time. Offer includes three scrubbing pads and a pad driver. Freight is additional.

TEECO CLEAN

Teeco Clean is the perfect liquid soap to assist your hand or machine washing or machine washing needs. The EPA-approved solution removes soils from tent tops with less time and effort than other soaps on the market while leaving behind a small environmental footprint.

- Teeco Clean is a concentrated formula to be mixed with water
- Available in gallon jugs or 55 gallon drums

TEECO JUICE

Teeco Juice is the most effective tent spot removal formula on the market. To develop this solution, we worked with chemists to create a product that easily removes gray smog, tree sap, tar, sticky residue from tape and stickers, and other stains commonly found on tent tops. To use, apply a small amount to a rag and wipe away (a little goes a long way!). Tougher stains may require the formula to sit on the tent for a short period of time before removing. Teeco Juice is safe to use on tent tops, tables, and chairs.

GENTLE SCRUB TENT DETERGENT

Teeco's Gentle Scrub Tent Detergent is a dry powder specifically formulated to safely and effectively work with your washer for the best results possible. This formula is designed to clean pollution off the dirtiest vinyl, strapping, and webbing. Gentle Scrub can be used at low temperatures, protecting your inventory from the damage caused by high-heat washes.

TEECO PAINT

Use on LEAF STAINS and any other stain you just cannot get out. Teeco Paint extends the life of tents by covering leaf stains that cannot be removed from fabric. To use, clean the area around the stain and paint over the discoloration. Tent washing machine friendly.

TEECO ERASERS

Small but effective, Teeco Erasers are designed to remove the most common stains on a tent at a very attractive price. To use, unwrap, wet, use, and toss. Each box includes 24 disposable sponges.

TEECO MICROFIBER CLEANING TOWELS

Using Microfiber towels for your tent cleaning means less work for you. Microfiber towels require less scrubbing and hold 3 times the amount of dirt compared to a traditional rag or towel. Each towel is 24" x 36" and is washable. A must have for any tent washing operation.

ELECTRIC DUAL ACTION HANDHELD CLEANING POLISHER

Use this powerful tool to clean your tops with ease. Great when used to clean small areas with stubborn stains. Ideal for removing decal residue or the sticky left from tape.

TEECO WIPES

Each 12x12" disposable microfiber cloth is coated with the Teeco Juice to eliminate stubborn stains and built up dirt. Great to have on any delivery truck for last minute tent cleaning. Clean tar, tape, greying tents and general stains.
